Tender No.55(06)2015-Pur/T-71

Dated November 26, 2015

2D/3D Seismic Job Services in the State of West Bengal and Jharkhand

<u>M/s. Results Survey Pvt., Ltd., Chennai</u>		
Sl.No.	Queries	Answers
1)	NGRI has made two separate tender for 2D / 3D Seismic Job Services and Topo graphic survey at Jharkhand and West Bengal which may lead to operational difficulties thus would impact smooth functioning thus bidder request for an integrated tender covering both the services.	<i>Bidder can participate in the both the tenders for both Seismic job services and Topographical surveys.</i>
2)	Generally in Seismic Contract (mostly from PSU), Clients also allow technical collaborator or consortium route for qualification. This will help the newly formed company to qualify. In view of this we also request NGRI to allow Technical Collaboration / Consortium for qualification purpose.	<i>We may allow technical collaboration / Consortium as requested by tender in the interest of getting competitive quotes as during the previous tendering we received only one offer.</i>
3)	At the time of bidding bidder can provide List of Key personnel only and will also confirm that adequate (equipment and Vehicles) as per project requirement would be deployed at project site. Please review	<i>Bidder should provide type and quantity of equipment including vehicles and list personnel's qualifications along with experience at the time of bidding and also confirm the same before execution of the work.</i>
4)	As there are many activities involved post signing of contract and before completing the mobilization (Testing of equipment, setting up base camp, project office, sub-contracting arrangement for petty services, communication facility in the field location etc.) Thus we request NGRI to provision 45 days for Mobilization from the date of signing the contract Note: Please also confirm that would NGRI handover the equipment at designated filed location or we need to receive it from NGRI warehouse and then transport same at contractors cost), as if successful bidder has to transport the equipment then please provide the location of equipment to make an assessment on time and cost required for transporting equipment and Vibrators)	<i>Mobilization time remains unchanged. Bidder's request cannot be accepted.</i>

Sl.No.	Queries	Answers
5)	Bidder understand that NGRI will also accept Fixed Deposit Receipt(FDR) towards EMD. Please confirm	<i>The submission of EMD in the form of Fixed Deposits (FD) receipt is acceptable. The FDR shall be in the name of Director, NGRI.</i>
6)	Please clarify which all expenses NGRI is referring here.	<i>The contract would require that all expenditure for execution of contractor should be paid by them and they should claim payment through their invoice as per payment terms of the resulting contract. In case of any default on part of the contract, in making any payment for execution of contract, such payment would be paid directly by NGRI being the primary contractor and such payment / expenditure would be deducted as per subject clause provisions.</i>
7)	Bidder request that as damage to crops, field etc is part and parcel of Vibrator Seismic Operations thus bidder request that any Legitimate compensation towards damage, compensation cost etc. should be reimbursed to contractor.	<i>Bidder should quote price accordingly covering all compensations related crop/field etc. There will not be any reimbursement towards this item.</i>
8)	As NGRI own these equipment we consider - NGRI would be having necessary insurance for equipment including transit insurance and location specific insurance, please confirm. - In view of cost of equipment like Vibrosis, seismograph, etc., Provision of replacement cost is not acceptable. - In case of minor repair of equipment we will do the necessary repair at the project site itself however if any repair / replacement required in the equipment which requires manufacturer's attention, NGRI should take up issue / send the equipment to respective manufacturer for resolving the problem at its cost for repair of equipment - please confirm	<i>Safety and security of the equipments at the field site and base camp would be solely Bidder's responsibility.</i>

9)	NGRI has to issue form 5 and 6 - please confirm. Further to it as Seismic Activities would be requiring radio frequency for communication in field, we consider NGRI would be providing adequate VHF Radio Sets along with radio frequency license.	<i>NGRI would issue form No.5 & 6 for getting labour license, with suitable modifications as per NGRI requirements/contract terms.</i>
10)	Please confirm should we consider that our working area at all the locations specified in the tender are out side the limit of forest area; If not then NGRI will obtain permissions for seismic activities (including spread layout) in forest areas.	<i>The proposed survey area does not fall in forest area. However, if required, for any part of the area, NGRI will provide necessary documents to Bidder for obtaining permission.</i>
11)	We request NGRI to pursue and ensure that Necessary permissions are in place before start of project execution. Crew will stand by if we don't get the permission from necessary authorities.	<i>NGRI will provide necessary documents to obtain permission from statutory / local authorities before execution of the work. Bidder must be involved in all the affairs to expedite the matter.</i>
12)	Bidder consider as the survey work would be different contract thus any map preparation would be done by Survey Contractor. And if any further inputs need to provided by SJS contractor then that can be over and above the map from Topographic Survey contractor.	<i>NGRI will coordinate with Topographical survey and Job services teams. Both teams should work as per the instructions of the NGRI field party chief.</i>
13)	To make realistic assessment on efforts required please provide some of the key survey parameter (namely Bin Size, SLI, RLI, Aspect Ratio, Active Channel in each line, No. of Receiver lines, Line Bearing, Foldage requirement etc.) Further to it as we have an assessment on average shots/ sqkm bidder request that schedule of rate should provision for payment per accepted shots basis.	<i>Survey parameters will be finalized after completion of the experimental work. Tentative field parameters will be receiver interval: 10m, Receiver Line Interval: 20/40m, Source interval: 20/40m, Source line interval: 20/40m, Total no. of Receiver lines: 8/10 lines per shot. Other parameters, if any, will be decided by NGRI party chief during the field work. Schedule of rate will be per each accepted active channel per shot only.</i>
14)	Each day manpower deployment List is unrealistic and can not be provided. However if required then monthly operational report providing relevant statistics may be provisioned.	<i>1) List and names of responsible representatives with whom NGRI will coordinate should be given. 2) The listed representatives should provide Daily Programme Report</i>

15)	As Seismic Equipment would be lying in field and would be directly exposed to sunlight thus bidder request fore review of the said clause however if successful bidder commits that equipment safety would be utmost concern while executing the project	<i>Bidder should make necessary arrangements to protect instruments being used in the field from direct sun light and rain as required.</i>
16)	Bidder request confirmation on number of NGRI/ CMPDI persons to be considered while provisioning for stay and other logistics for client representatives.	<i>No. of CMPDI officials will not be more than four at any given time during the field work. This will be intimated as and when required.</i>
17)	Under schedule of rate the Mobilization and Demobilization charges are asked in same line item. As Mob happens in the beginning and De-mob happens at end of the project, we request NGRI to break this into two line item, hence payment can be paid accordingly at the completion of Mob and De-mob	<i>Mobilization and Demobilization can be quoted separately.</i>
18)	Bidder request to provision standby and force Majeure in Schedule of rate	<i>No provision for standby charges and Force Majeure</i>
